Personalise your kit

Make your club stand out by creating a real team spirit and a sense of belonging. Personalise clothing by adding names, numbers and initials all available at MR Cricket Hockey.

Printing and embroidery

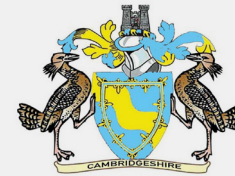

Embroidery is best for creating logos on thicker garments, such as polo shirts, jumpers, jackets or hoodies. Embroidery on garments are long lasting, durable and vibrant. Embroidery may cost a little more than traditional printing, however the longevity makes it cost effective.

Printed / heat sealed logos also known as heat transfer printing, is the process of applying heat transfer materials to various garments with a heat press. Excellent for very detailed or large logos and especially good for thin breathable modern fabrics used in team wear. With larger designs, we would recommend printing over embroidery.

Dye-sublimation printing yields beautiful and permanent colours that are embedded in the substrate or fabric, rather than printed on the surface. Images on the fabric won't fade or crack even after multiple washings. You can incorporate your club crest and any number of sponsor logos all in the price of the garment. Very cost effective and a great option if you have multiple sponsors.

CUSTOMISABLE MITEAM 19

The T19 range is fully customisable with 19 colours that can be used to create your own unique designs. Each garment has a customisable base colour and side panel. Stripes can be added and also customised or removed completely. The adidas logo can be moved to the sleeve and is also customisable in colour.

The miTeam 19 range has 5 new sublimated graphics, as shown below, which are available for short sleeve, long sleeve and tanks only. The chosen graphic is applied onto the front of the jersey, leaving the back plain to allow for names and numbering.

MiTeam leadtime is 45 days from order to delivery*. Names, numbers and initials can be printed onto garments and logos can be printed or embroidered. Sublimated garments can have sublimated personalisation on the front of garments only.

MiTeam 19 gives you the flexibility to create your kit, your way.
